

Embracing the Truth of Your Divinity

~ BEING the New You ~

“Reality is Observer Created” - Dr. Werner Heisenberg

“Consciousness and Energy Create the Nature of Reality” - Ramtha

The Intelligences of Science and Spirituality come together in partnership to assist Humanity in understanding that WE can re-create ourselves in a more Divine way; thus becoming Conscious Creators of a reality that we truly desire to BE in.

Through a process of accepting and embracing the Intelligences within both Science and Spirituality that resonate with who we are, we initiate a state of Peace within ourselves that becomes the foundation for new creation. This very act will harmonize out of balance thought and energy. As we walk the path of Peace, we re-create ourselves and heal relationships to ourselves and ALL that is in our proximity... and more!

“When you heal yourself you heal the world” - A Course in Miracles

How can this be so ... ?

The following excerpt from the book “Dear Cosmos” by David Allison will give insightful information from a Scientific point of view:

Remember that *“Quantum Physics has shown that ‘Reality is Observer Created’ and you/You/YOU are the creator of your realities.”* What is the source of all this happening??? ... **Brace yourSELVES...**

When You go all the way down into the smallest particles that are sourcing this phenomenon ... here is the Nitty Gritty: “Your Neurons!!!”

*The Neurons in your brain transmit energy that, by Divine Design, automatically organizes Electrons/Intelligences/Potentials into an ‘Illusory Reality’ that you perceive as ‘Very Real’. Thank God ... otherwise you would have no reflection of what you now are. **This is one of the Greatest Gifts and Holographic Games** in the cosmos, and **some beings know it! Now You Do!***

*OK ... more details ... Your previous experiences have influenced and organized your neurons into 'grey matter' (short range neuron bundles) and 'white matter' (long range neural pathways) and they are always transmitting energy signals as to **What You 'NOW' Believe to be True** Consciously & Unconsciously.*

So ... from my perspective, beliefs can be considered as a merging of thought and energy which results in a specific experience. It is through this 'experience' in repetition that we form beliefs.

The importance of beliefs was brought to my attention as I paused briefly while writing a previous article for The Journey of Possibilities E-Magazine. I stopped to look out the window as I reflected on a thought, and when I returned to my I-pad, these words magically appeared on the I-pad; *"Discover beliefs ... beliefs are superior to natural law."* I was excited, astonished, yet very grateful for this information, as it validated personal work that I was doing.

Our thoughts transmit information from past experience (beliefs) through our nervous system. Unless we change, transform, or transcend this information, via new thoughts, perceptions, or understanding we relay the same information over and over, creating a deeper, stronger, and persistent pattern of thought.

When we understand how we are creating our reality, it makes it easier to understand what moves our reality ... ENERGY!

The amount of energy that we give to our thoughts determines how we organize our energy. For example; through personal childhood experience, I organized energy around the concept of "lack." My parents, doing the best they could, raised five children on a single income. What I thought I needed as a child, was not always provided, therefore I created a persistent pattern. I placed more thought and energy in *disappointment* than on Gratitude for what I did have. In a state of Gratitude, I become completely *satisfied* with what I have and what I am experiencing.

How might we have more understanding and conscious ability to direct our lives in a Divine way?

Every Human, as they deem themselves ready, has the ability to re-create their reality so that they are living as they truly wish to live. My personal experience comes through an understanding of the *Twelve Rays of Light*. These Rays are the architects of light frequency that compose our reality; as we embrace the positive aspects of these Rays we move more fully into Divine Alignment and create a firm foundation for our existence on Earth. Each Ray represents a color, frequency of vibration, and spiritual aspect or quality that we can use to enhance our personal soul growth and vibration.

There are different resources for this information. I resonated with the more current work of Natalie Glasson: [The Twelve Rays of Light; A Guide to the Rays of Light and the Spiritual Hierarchy.](#)

As I work with the Twelve Rays of Light to embrace and enliven my personal frequencies and energetic qualities, I experience a greater sense of Balance and Peace in my life. For example: Ray Four assists with conflict, and promotes Harmony. In June of 2017, following Inner Guidance, I asked a few friends: Suzy Greene, Rosemary Slade and Carol Crosby, (*in order left to right*) to join me in creating an environment for others to experience the frequencies of the Twelve Rays of Light, and establish communication with the Masters of each Ray. We combined our talents and abilities through several meetings to plan and prepare a protocol that would initiate and open this Divine Connection.

This endeavor resulted in the development and opening of a portal of energy on July 25th, 2017 in what we now call *The Cosmic Field*. We established an Intergalactic Grid (later an Interdimensional Association with the *Solar Cross* was infused) and a Twelve Rays of Light Ceremony was performed to invoke the higher vibrational frequencies of Light from their governing Masters.

As we open to new scientific discoveries that are happening more now than ever; as we increase our desire for spiritual maturity, understanding, and balance; new Possibilities become plausible and new Potentials come into view. We then come into a greater balance between mind & heart and spirit & matter, becoming the “New You” in a reality of your design.

Namaste and Blessings on your Journey ...
